DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method for registering users of a central computer system and determining whether the user is registered with the central computer system, classified in class 709, subclass 219.
- II. Claims 13-29, drawn to a method of operating a measurement device attached to a remote computer system to measure and load medical information of a user who wants to register at a central computer system, classified in class 600, subclass 300.

Newly submitted claims 13-29 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: they are directed to a method of operating a measurement device attached to a remote computer system to measure and load medical information (measured blood pressure and weight) of a user who wants to register at a central computer system.

Art Unit: 2153

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 13-29 are withdrawn from consideration as being directed to a non-elected invention. **See 37 CFR 1.142(b) and MPEP § 821.03.**
